Apex Retail Group: Prompt Engineering Assignment

Introduction

This assignment applies prompt engineering techniques to a consulting case for Apex Retail Group, a 45-store apparel retailer with \$12M in revenue, falling margins and foot traffic, and weak e-commerce performance. Using Chain of Thought, Persona, Tree of Thoughts and Planning prompting, we diagnosed the root cause (manual inventory tracking), compared three strategic branches with a weighted decision matrix, and built a 12-month implementation roadmap with a risk registry for the winning strategy, Branch A (E-Commerce & Logistics Overhaul).

Files Created

1. apex_retail_advisory_log.md - client dossier, SWOT, root cause, gap analysis, Tree of Thoughts evaluation (REQ-001 to REQ-003) and the weighted decision matrix.
2. implementation_roadmap.md - phase outline, risk mitigation registry, and detailed milestones, activities and RACI assignments (REQ-004, TR-003).
3. readme_topic4.pdf - this document.
